

Exporting Citations from *SciFinder* into *RefWorks*

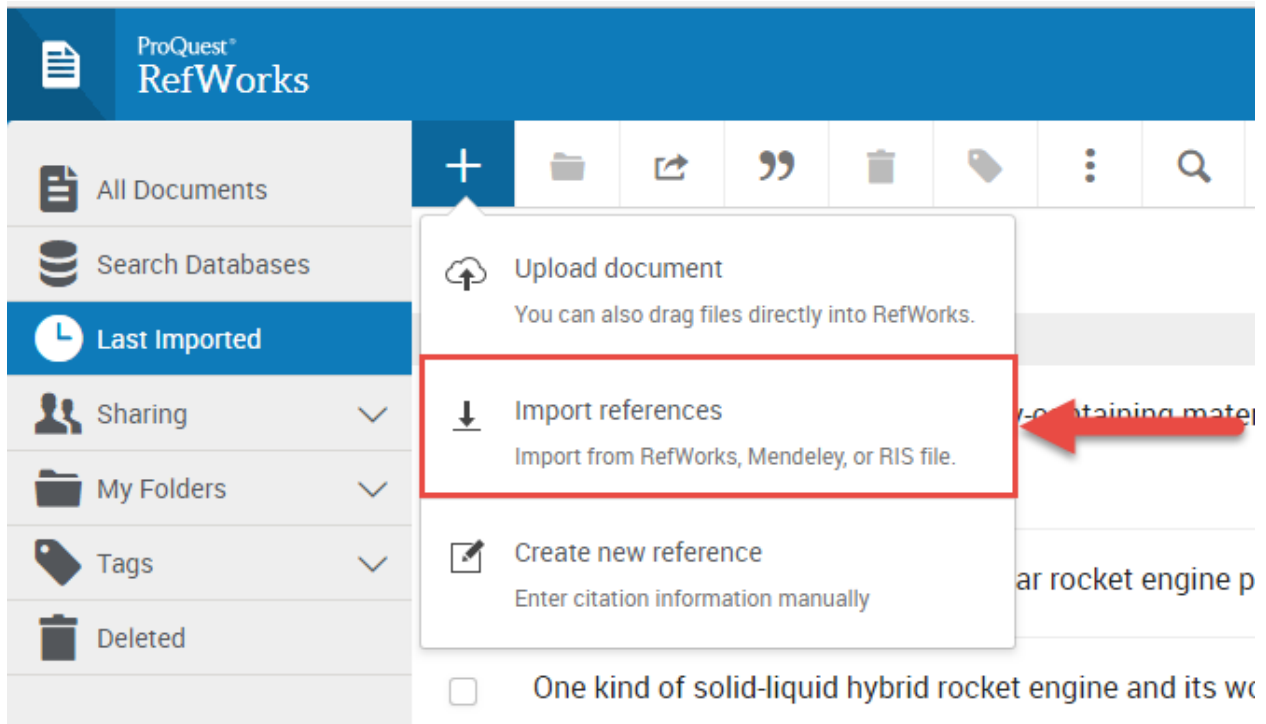

In *SciFinder*

- Click in the box to the left of desired citations
- Click “Export” (located on the right side of the navigation bar)
- From Export window choose citations to export (e.g. “Selected”)
- For Citation Manager select “Tagged Format (*.txt)”
- Under Details, create a file name for your citations and save to your desktop
- Click “Export” button

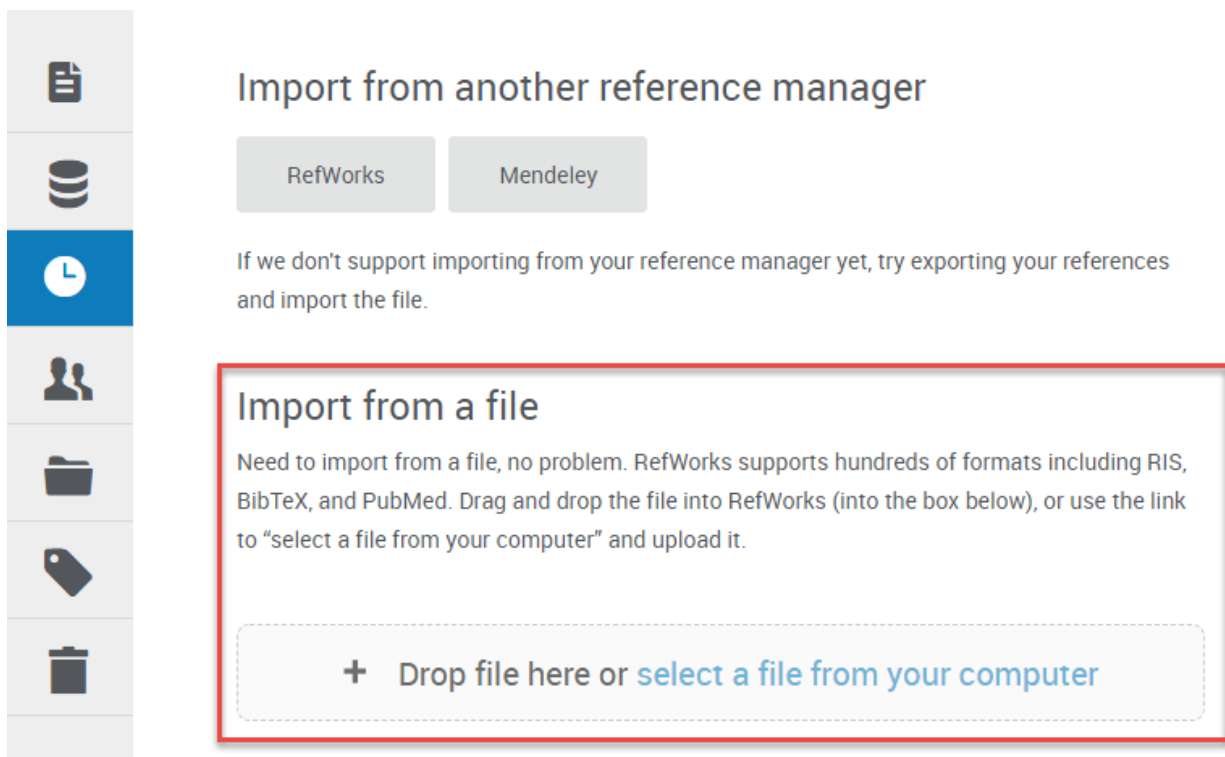

In *RefWorks*

- Log in to your RefWorks database if you have not already done so
- Click on “+” from navigation bar

- Select “Import references” from drop-down menu

- The “Import References” window will open
- Either drag and drop or select the .txt citations file saved from your computer

- A new window - titled “What is the format of this file?” will appear
- Search for “CAS SciFinder” in the search bar

What is the format of this file?

You've selected **Reference_03_07_2018_141205.txt** (10.354kb).

We're not sure how to import this file, can you select the type of file.

- Canadian Science Centre for Human and Animal Health
- CAS SciFinder**
- CSA (Cambridge Scientific Abstracts)
- Dialog - Datastar (Tagged Format) [Social SciSearch(R) (SSCI)]
- Dialog (Tagged Format) [SciSearch]
- show 21 more...

- In the dropdown that appears - select “CAPlus”

What is the format of this file?

You've selected **Reference_03_07_2018_141205.txt** (10.354kb).

We're not sure how to import this file, can you select the type of file.

This file will be imported as:

CAS SciFinder

Selecting the correct format will help you get the best results.

- CAPlus**
- Medline

- Click “Import” button
- A message confirming the file import will appear.
- Your citation(s) will automatically be imported into “All Documents” tab; they can also be viewed under the “Last Imported” tab
- You may view the records or move them to the folder of your choice
