An Instructor can easily add a Library Resources Block within a Moodle course in eClass.

This is a general block of basic Library Resources which can be further customized by yourself as the instructor or by your Subject Librarian. Please read along for details on customization options.

Step 1: Add the Block
While logged in to a course within eClass/Moodle, turn editing ON and scroll down along the right-hand side of the course; you will see a section ‘Add a block’.

Choose Library Resources

Step 2: Configure the Block
Once the block has been added, you can configure it by adding in Library Resources (library guides, databases, etc). Likewise, you can also ask your Subject Librarian to do this for you; more information about this option at the end of the document.
Once you are in Configure mode, you can choose what students see in eClass; the Library resources block is set by default to include the first 3 options.

If you wish to show additional course resources (customization) click on Show course resources and then add in resources as desired.

Note that you can link text to a URL with the ‘link’ button

*Be sure to save changes! At the bottom of the page*
Step 3: Finished Product – Library Resources Block with Customization

The blue box at left shows a Library Resources block with added Course Resources; in this case, a Library-created course guide.

The blue arrow indicates the icon you can use to move the block to a different place on the course. We recommend moving it up to the top of the right column.
