

## Adding a Library Resources Block to a Moodle Course in eClass

### Customization by Your Subject Librarian

If you would like your Subject Librarian to add and/or customize the Library Resources Block, simply add them to your course in Moodle as a Designer; you can find the name of your Subject Librarian at: <https://www.library.ualberta.ca/about-us/staff/subject-librarians>.

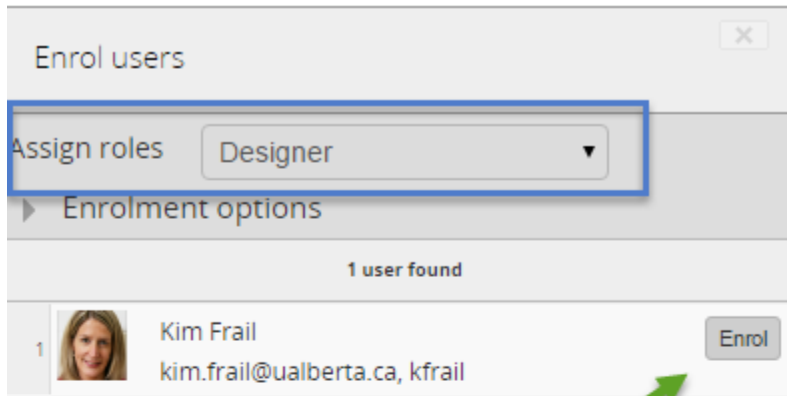

### Step 1: Enroll Subject Librarian as a User and Assign Role as Designer

**Step 1:** In course administration, choose Users, then Enrolled Users; you will have a list of users.

Then click on **Enroll users top right of page:**

Enrol users

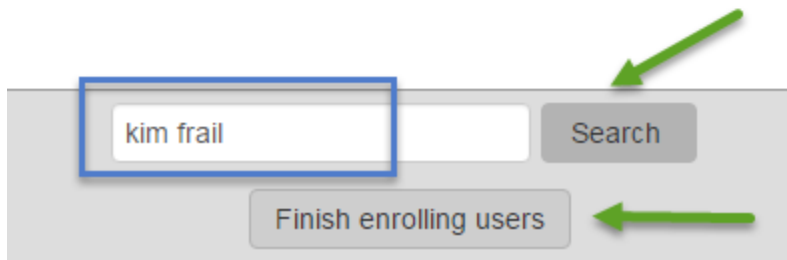

Change the role to *Designer* and search for your Subject Librarian's name in the search box at the bottom.

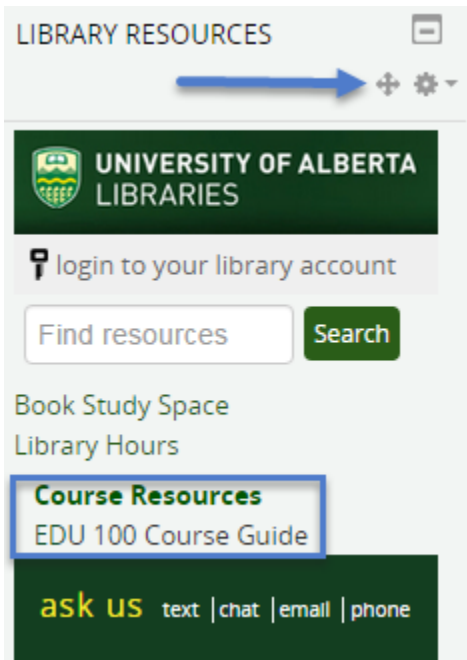

Make your selection, choose *Enrol* beside their name and click *Finish enrolling users*.

Let your Subject Librarian know that you have added them as a Course Designer so they can customize your library block.

You can always unenrol users at any point.

## Step 2: Finished Product – Library Resources Block with Customization

The blue box at left shows a Library Resources block with added Course Resources; in this case, a Library-created course guide.

The blue arrow indicates the icon you can use to move the block to a different place on the course. We recommend moving it up to the top of the right column.

For questions or comments related to this Library Resources Block please contact your Subject Librarian: <https://www.library.ualberta.ca/about-us/staff/subject-librarians>
